---

## Objective

Motivated Computer Science engineering student with a strong passion for web development, problem-solving, and innovative technologies. Eager to leverage my skills and creativity to contribute effectively to dynamic teams, while continuously learning and growing in a challenging environment.

---

## Education

- **Bachelor of Technology (B.Tech) in Computer Science and Engineering**  
Academy of Technology, Hooghly, West Bengal October 2022 – Present  
CGPA: 8.81/10
- 

## Skills

- **Programming Languages:** Java, Python, JavaScript, C++, C
  - **Web Development:** HTML, CSS, React, Tailwind, Node.js, Express.js
  - **Databases:** MySQL, MongoDB
  - **AI/ML:** Numpy, Pandas, Scikit Learn, Gemini, Mistral AI
  - **Tools and Technologies:** Git, GitHub, Firebase, VS Code
  - **Others:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)
- 

## Projects

- **Career Compass**
    - Developed the backend of an AI-driven full stack career guidance website.
    - Used Node.js and Express.js with Mistral AI.
  - **Bio Care**
    - Developed both the frontend and backend of a Biology teaching website.
    - Techstacks: HTML, CSS, JS and Express.js.
  - **Car Price Prediction Website**
    - Created a car price prediction website using Machine Learning (using linear regression)
    - Used Scikit Learn, Numpy, Pandas and deployed using Streamlit.
  - **Code Reviewer**
    - Created a responsive code reviewing website using React and Gemini API.
  - **News60**
    - Developed a MERN stack app that fetches and displays news articles using News API with a modern save feature.
- 

## Achievements and Leadership

- Solved 200+ problems on LeetCode and GeeksforGeeks.
- Participated in various hackathons like Hacktropica and Binary.
